ABOUT KAPHS

KAPHS is a Swiss Company founded in 2003 by Mr. Anil Sareen.

Our family-owned operation prides itself in specializing in the engineering, manufacturing and supply of high-end Metal & Glass products for Façade application as well as Interior Design purposes.

With a focus on the Middle-Eastern market and its requirements, **KAPHS** has built a diversified offering of Architectural Products in line with the region's evolving demands and technology.

Thanks to our extensive experience working with Architects, Interior Designers and Contractors, we aim to always offer our customers the most effective and appropriate solution to their needs.

KAPHS provides In-House Engineering throughout the life of a project until completion to ensure the utmost satisfaction to our clients.

Our trusted partnerships with European Manufacturers, whom we have represented for over two decades in the Middle-Eastern region has enabled us to accomplish a remarkable portfolio of landmark projects across the Gulf countries.

As a result of our local fabrication abilities, **KAPHS** offers ready-to-install material to support our customers.

KAPHS PRIVA

KAPHS PRIVA

Product Description

The **KAPHS Priva** collection features advanced technical fabrics designed for a variety of architectural applications, blending superior aesthetics with high functionality. Engineered for durability, transparency, and optimal light diffusion, these mesh fabrics are ideal for both exterior and interior projects.

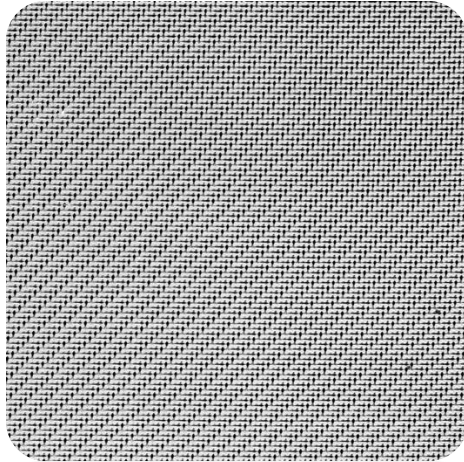

KAPHS Priva is crafted for applications where visual appeal and performance are essential. The fabric's precision weave ensures consistent light transmission and airflow while providing UV protection. Made from high-strength polymer or metal fibers, this mesh is perfect for facades, solar shading, and interior design elements, offering durability, UV resistance, and customizable colours and patterns.

KAPHS Priva is highly suitable for lamination processes, allowing their integration into laminated glass structures. Lamination enhances the mesh's structural properties while maintaining its transparency and design features.

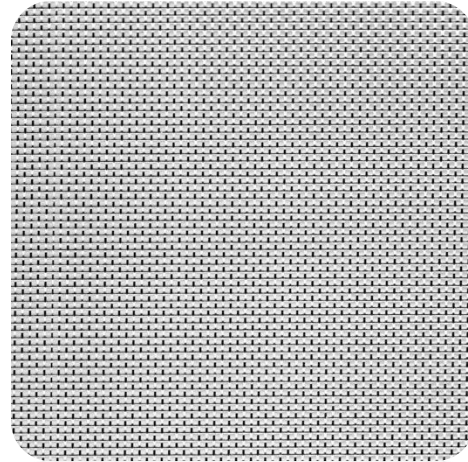

Laminated **KAPHS Priva Mesh** can be used in safety glass, where it adds extra strength and impact resistance, as well as in decorative and solar control glass, where it creates stunning visual effects and improves energy efficiency in buildings.

KAPHS PRIVA

Applications

KAPHS Priva products are highly versatile and can be applied in a variety of architectural and design contexts, including:

-Facades: The mesh enhances the aesthetic appeal of building exteriors while providing functional benefits like solar shading and protection against environmental elements.

-Solar Shading: By regulating light transmission, KAPHS Priva reduces heat gain, improving the energy efficiency of buildings and contributing to a comfortable indoor environment.

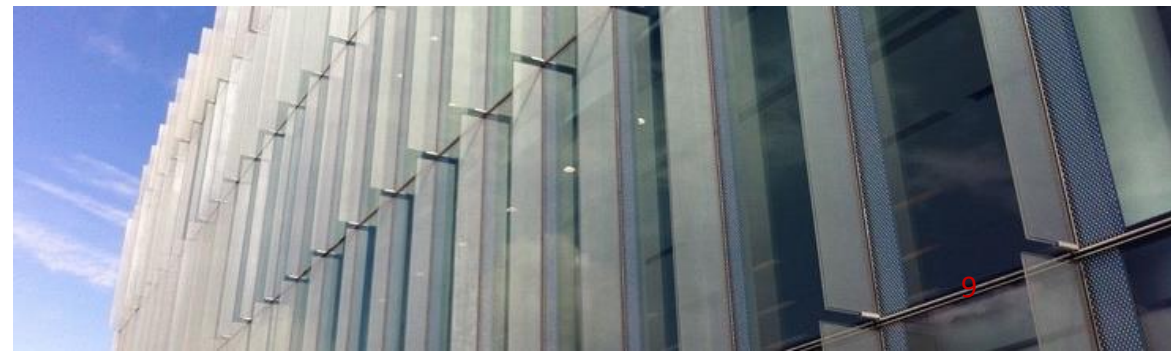

-Interior Design: The mesh can be used as decorative partitions, wall coverings, or ceiling elements, adding texture, depth, and modern design to interior spaces.

-Canopies: The mesh provides an effective solution for outdoor shading, offering protection from the sun while maintaining airflow and visibility.

-Railings and Balustrades: KAPHS Priva can be incorporated into glass railings and balustrades, combining safety with modern design aesthetics.

-Partition Walls: In both residential and commercial spaces, the mesh can be used to create lightweight, semi-transparent partition walls that offer privacy without sacrificing openness and light.

These applications highlight the adaptability of **KAPHS Priva Mesh**, making it an ideal choice for architects and designers seeking to blend form and function in their projects.

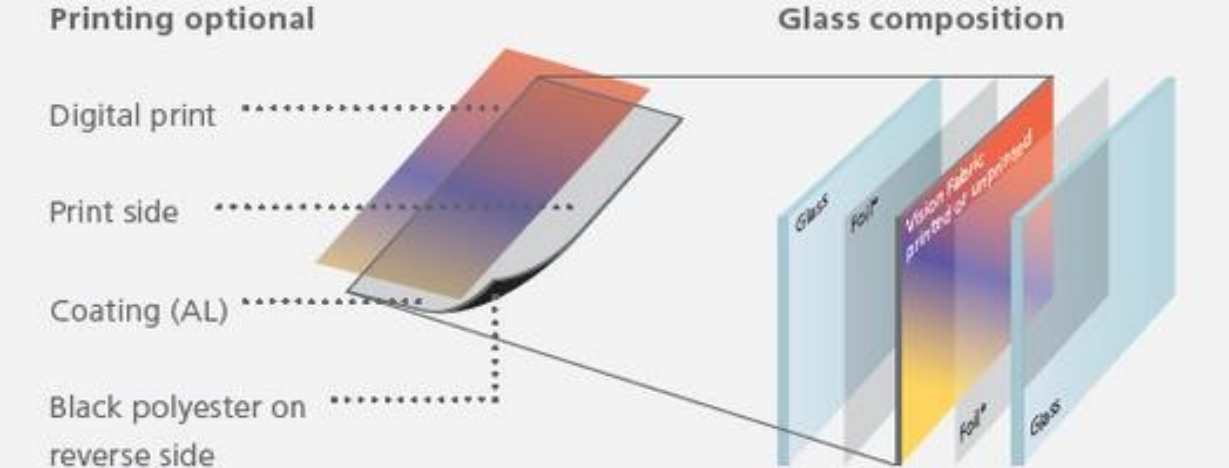

KAPHS PRIVA

Customization

Cast Acrylic Mesh, is a premium material that seamlessly blends acrylic with embedded metallic or textile mesh, creating a dynamic and visually captivating surface. This innovative material is designed for a range of luxurious and high-impact interior applications:

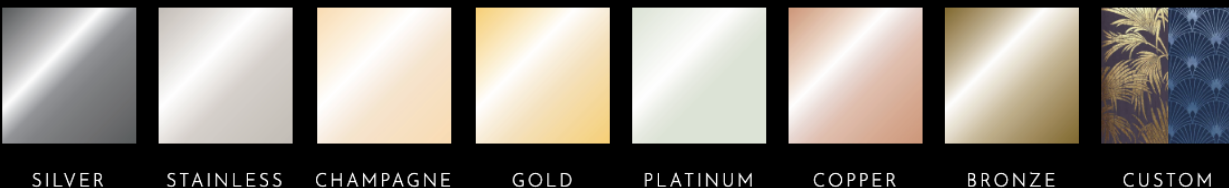

- Interior Partitions:** Adds a sophisticated, modern element to office spaces, retail environments, and luxury residences, offering both privacy and visual intrigue.
- Decorative Wall Panels:** Transforms plain walls into works of art, perfect for reception areas, feature walls, or hotel lobbies.
- Furniture Design:** Ideal for creating custom furniture pieces like tables, shelves, or cabinet doors that stand out as statement pieces.
- Lighting Fixtures:** Enhances lighting designs by diffusing light in unique ways, adding a decorative and functional element to any space.
- Retail Displays:** Elevates the aesthetic of retail environments, making products stand out with a high-end, contemporary look.
- Bar and Countertops:** Offers a luxurious and durable surface option for bars, reception desks, and kitchen islands, combining practicality with eye-catching design.

Broletto Offices

The **KAPHS Priva PW 45 Gold** mesh was selected for the laminated glass fins on the facade of the Broletto Offices in Milan, bringing both functional and aesthetic enhancements to this iconic building. This high-performance mesh is embedded between layers of glass to create striking vertical fins that not only contribute to the building's modern architectural expression but also provide essential solar shading and glare reduction.

With its metallic gold finish, adds a luxurious and contemporary touch to the facade, reflecting light in unique ways throughout the day. The mesh's fine weave ensures a delicate balance between transparency and opacity, allowing for controlled light diffusion while maintaining the building's energy efficiency.

These laminated glass fins serve multiple purposes: they enhance the visual appeal of the facade, contribute to the building's overall thermal performance, and provide privacy for the interior spaces without compromising on natural light. The use of **KAPHS Priva PW 45 Gold** in this application highlights the material's versatility and its ability to elevate architectural designs through both functional and decorative contributions.

Armani Fiori

The **KAPHS Priva PW 35 Platinum** mesh was chosen for the interior design of the Armani Fiori Store, enhancing the space with a sophisticated blend of elegance and modernity. This finely woven mesh, with its platinum finish, was integrated into various design elements throughout the store, including decorative panels, partitions, and display cases.

The mesh contributes to the store's luxurious atmosphere by adding a subtle shimmer and refined texture to the interiors. Its delicate balance between transparency and opacity allows light to pass through while softly diffusing it, creating a warm and inviting ambiance that complements the high-end floral arrangements and products on display.

In addition to its aesthetic qualities, the mesh serves practical purposes by defining spaces within the store without obstructing views or diminishing the open, airy feel. The use of **KAPHS Priva PW 35 Platinum** in the Armani Fiori Store exemplifies how this material can elevate retail environments, combining form and function to create a distinctive and memorable shopping experience.

Bernina 7

The **KAPHS Priva PW 35 Platinum** mesh was selected for the laminated glass fins on the facade of the Bernina 7 project in Milan, contributing both architectural elegance and functional performance to this modern building. This premium mesh, known for its platinum finish and fine weave, is laminated between glass layers to form sleek, vertical fins that define the building's exterior.

The mesh adds a refined metallic sheen to the glass fins, enhancing the visual appeal of the facade while interacting dynamically with natural light throughout the day. Its semi-transparent nature allows for controlled light penetration, reducing glare and heat gain within the building while maintaining an open, airy aesthetic.

These laminated glass fins not only serve as a striking architectural feature but also improve the building's energy efficiency and provide privacy for interior spaces. The use of **KAPHS Priva PW 35 Platinum** in the Bernina 7 project underscores the material's versatility and its ability to enhance contemporary architecture with a perfect blend of style and functionality.
